

# Lighten Their Load, Put A Spring In Their Step.

Providing the muscle for moving all types of supplies, containers and merchandise, the Transporter navigates the tightest location with precision and ease.

Standard platform is 24" x 48", with custom sizes available. Carries large and heavy loads with compact design. The powerful 300-watt drive motor does not lag when going up inclines.

Swivel casters and a transaxle drive provide 360-degree maneuverability.

Less stress, results in more productivity and a large reduction in injury due to manually moving large loads around your facilities.

## with the **Transporter**

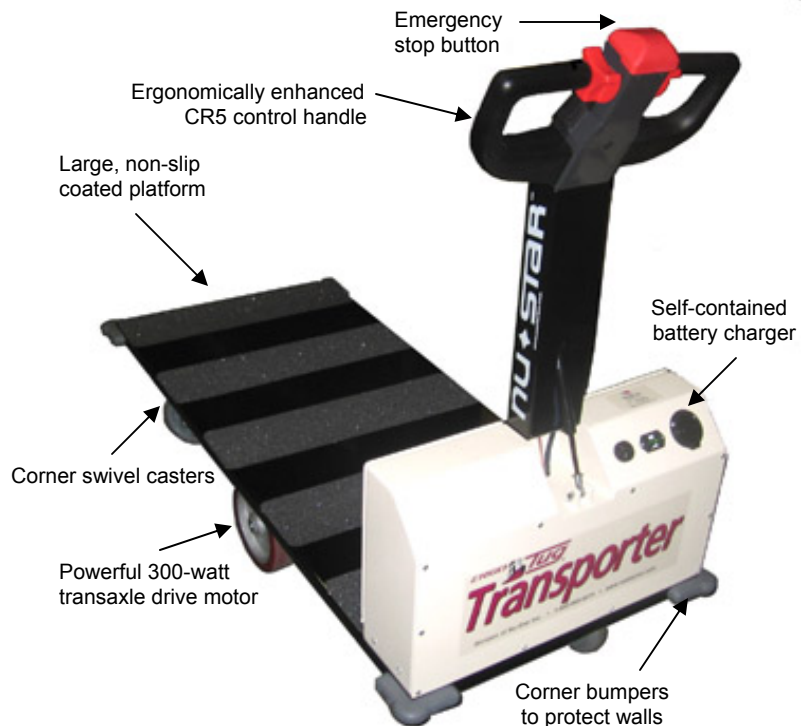

Adjustable-height control handle arm allows operator to push or pull the Transporter.
