

CART MOVERS

Reduce the risk and cost of employee injuries, while increasing productivity with the ERGOtug.

- Healthcare
- Linen/Laundry
- Food Service
- Hospitality
- Janitorial
- Warehouse

Highly maneuverable, compact and easy to use...the ERGOtug automatically pulls carts that are equipped with two fixed or four swivel casters with no modification required. Carts can be moved with little effort, relieving the cumulative effect of manually pushing and pulling heavy items. The operator faces the direction of travel, greatly reducing the risk of injury to themselves and others.

No modifications or special hitches required

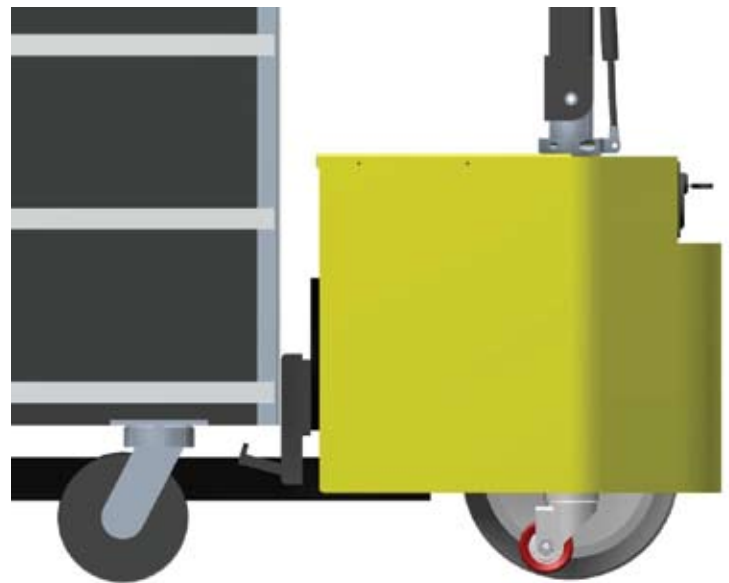

We adapt our machine to work with your equipment

An automatic hitch slightly lifts and moves most types of carts without the cost of modifications or additional hitches.

Pull up to the cart to be moved, push the lift button and drive off by pressing the proportional speed control. The unique 180-degree-plus steering assures precise maneuvering in elevators and other tight locations.
